

Daily Weather Maps

JANUARY 4, 2010 - JANUARY 10, 2010

The following charts are the principal charts of the former National Weather Service publication, "Daily Weather Map." They are the Surface Weather Map, the 500-Millibar Height Contours chart, the Highest and Lowest Temperatures chart, and the Precipitation Areas and Amounts chart. All charts are derived from the operational weather maps prepared at the National Centers for Environmental Prediction, Hydrometeorological Prediction Center, National Weather Service. The symbols on the Surface Weather Map and the 500-Millibar Height contours are standard international symbols.

The Surface Weather Map shows station data and the analysis for 7:00 a.m. EST. Areas of precipitation are indicated by shading. The weather reports displayed here are only a fraction of those on which the analyses are based. Occasional apparent discrepancies between the printed station data and the analyses result from the absence of station reports not included here because of a lack of space.

The 500-Millibar Height Contours chart shows height contours (solid lines), temperatures (dashed lines) and winds (arrows) at the 500-Millibar pressure level at 7:00 a.m. EST. The height contours show the height of the 500-millibar pressure level in dekameters above sea level and isotherms, the lines of constant temperature, are shown in degrees Celsius. Arrows show the wind direction and speed at the 500-Millibar level.

The Highest and Lowest Temperature chart shows the maximum temperature for a period from 7:00 a.m. EST the previous day through 1 a.m. EST and the minimum temperature for the period from 7:00 p.m. EST the previous day through 1 p.m. The maximum temperature is plotted above the station location and the minimum temperature is plotted below.

The Precipitation Areas and Amounts chart shows areas (shaded) that had precipitation during the 24 hours ending at 7:00 a.m. EST, with amounts to the nearest hundredth of an inch. "T" indicates a trace of precipitation.

The *Daily Weather Map* is published weekly by the U.S. Department of Commerce, National Oceanic and Atmospheric Administration (NOAA). NOAA and IMC are responsible for managing, printing, and distributing the bulletin. The contents may be reprinted freely, with proper credit.

Annual subscriptions: Domestic and International subscriptions are \$75. Check and credit card (Visa, MasterCard, Discover, and American Express) payments are accepted. Payments (invoices) should be mailed to: **NNDC/NCDC, P.O. Box 70169, Chicago, IL 60673-0169**; or invoices faxed to: (304) 726-4409.

Send address changes to: **NCDC Subscription Services Center, 310 State Route 956, Building 300, Rocket Center, WV 26726**; call toll free: (866) 742-3322; TDD: (828) 271-4010; fax: (304) 726-4409; or E-mail: noaasubsvcs@imcww.com

Correspondence to the meteorologists should be directed to: ***Daily Weather Map*, NOAA/National Weather Service, Room 410, 5200 Auth Rd, Camp Springs, MD 20746.**

Surface Weather Map and Station Weather at 7:00 A.M. E.S.T.

This is a surface weather map of the North Atlantic Ocean and surrounding landmasses, including North America, Europe, and Africa. The map displays various weather features:

- Pressure Systems:** Several high-pressure (H) and low-pressure (L) systems are identified. Notable low-pressure systems are located off the East Coast of North America and in the central North Atlantic. High-pressure systems are found further west and south.
- Fronts:** Cold fronts (indicated by lines with triangles) and warm fronts (indicated by lines with semicircles) are shown extending across the ocean.
- Isobars:** Contour lines representing constant pressure values (e.g., 1000, 1008, 1012, 1016, 1020, 1024, 1028, 1032, 1036, 1040) are drawn across the map.
- Station Data:** Numerous weather stations are marked with symbols (circles, triangles, etc.) and associated numerical data representing temperature, wind speed, and other meteorological observations.
- Scale and Orientation:** A scale bar at the bottom right indicates distances in Nautical Miles (NM) from 0 to 500. A reference note states "True at 40.00N".
- Map Title:** The title "Surface Weather Map and Station Weather at 7:00 A.M. E.S.T." is located at the bottom right of the map.
