The following charts are the principal charts of the former National Weather Service publication, "Daily Weather Map." They are the Surface Weather Map, the 500-Millibar Height Contours chart, the Highest and Lowest Temperatures chart, and the Precipitation Areas and Amounts chart. All charts are derived from the operational weather maps prepared at the National Centers for Environmental Prediction, Weather Prediction Center, National Weather Service. The symbols on the Surface Weather Map and the 500-Millibar Height contours are standard international symbols.

The Surface Weather Map shows station data and the analysis for 7:00 a.m. EST. Areas of precipitation are indicated by shading. The weather reports displayed here are only a fraction of those on which the analyses are based. Occasional apparent discrepancies between the printed station data and the analyses result from the absence of station reports not included here because of a lack of space.

The 500-Millibar Height Contours chart shows height contours (solid lines), temperatures (dashed lines) and winds (arrows) at the 500-Millibar pressure level at 7:00 a.m. EST. The height contours show the height of the 500-millibar pressure level in dekameters above sea level and isotherms, the lines of constant temperature, are shown in degrees Celsius. Arrows show the wind direction and speed at the 500-Millibar level.

The Highest and Lowest Temperature chart shows the maximum temperature for a period from 7:00 a.m. EST the previous day through 1 a.m. EST and the minimum temperature for the period from 7:00 p.m. EST the previous day through 1 p.m. The maximum temperature is plotted above the station location and the minimum temperature is plotted below.

The Precipitation Areas and Amounts chart shows areas (shaded) that had precipitation during the 24 hours ending at 7:00 a.m. EST, with amounts to the nearest hundredth of an inch. "T" indicates a trace of precipitation.
MONDAY, JANUARY 11, 2016
Station Model

Wind Speed
Long Feather - 10 knots
Short Feather - 5 knots

3-Digit Surface Pressure (in tenths). Ex: 989 = 998.9mb, 012 = 1001.2mb

3 Hour Pressure Tendency (in tenths)

6 Hour Total Precipitation (in hundredths of an inch)

Highest and Lowest Temperature

500-Millibar Height Contours at 7:00 A.M. E.S.T.

24-hour Precipitation Areas and Amounts Ending 7:00 A.M. E.S.T.

WEDNESDAY, JANUARY 13, 2016
Surface Weather Map and Station Weather at 7:00 A.M. E.S.T.
THURSDAY, JANUARY 14, 2016
SATURDAY, JANUARY 16, 2016

Station Model

Wind Speed
- Long Feather - 10 knots
- Short Feather - 5 knots

Wind Direction

Current Temperature (in °F)

Visibility (in miles)

Present Weather Symbol

Dew Point Temperature

Sky Cover

3-Digit Surface Pressure (in tenths). Ex: 989 = 998.9mb, 012 = 1001.2mb

3 Hour Pressure Tendency (in tenths)

6 Hour Total Precipitation (in hundredths of an inch)

Highest and Lowest Temperature

500-Millibar Height Contours at 7:00 A.M. E.S.T.

24-hour Precipitation Areas and Amounts Ending 7:00 A.M. E.S.T.
### Station Model

### Meteorological Data

- **Wind Speed**
  - Long Feather - 10 knots
  - Short Feather - 5 knots

- **Current Temperature (in °F)**: [Values listed in the table]

- **Visibility (in miles)**: [Values listed in the table]

- **Present Weather Symbol**: [Symbols listed in the table]

- **Dew Point Temperature**: [Values listed in the table]

- **Sky Cover**: [Values listed in the table]

### Maps

- **500-Millibar Height Contours at 7:00 A.M. E.S.T.**
- **Highest and Lowest Temperature**
- **24-hour Precipitation Areas and Amounts Ending 7:00 A.M. E.S.T.**
